LinkedIn | GitHub | Portfolio Website

Professional Summary

Data Analyst and AI Engineer with experience in data analytics, machine learning, dashboard development, and AI-driven solutions. Proficient in Python, SQL, Tableau, Excel, and statistical analysis, with hands-on experience through DRDO research, business intelligence projects, and industry simulations. Skilled in transforming complex datasets into actionable insights and developing scalable analytical solutions to support data-driven decision making.

Education

Indira Gandhi Institute of Technology (IGIT), Sarang

2022 – 2026

Bachelor of Technology (B.Tech), Computer Science & Engineering

Experience

Research Intern – DRDO, Baleswar

May 2025 – Jun 2025

Computer Vision & AI Research

- Led a team of 5 in developing a real-time multi-object tracking system using Kalman Filters.
- Implemented object detection and tracking pipelines using Python and OpenCV, improving processing efficiency.
- Collaborated with DRDO scientists on simulation integration, technical documentation, and video analytics workflows.

Projects

Customer Churn Prediction

GitHub

Python, Pandas, NumPy, Scikit-learn, XGBoost

- Developed a telecom customer churn prediction pipeline using Logistic Regression, Random Forest, and XGBoost, performing data cleaning, feature engineering, exploratory data analysis, and model evaluation to identify the best-performing model.
- Leveraged Python, Pandas, Scikit-learn, and XGBoost to generate customer retention insights and support data-driven decision making.

End-to-End Stock Market Dashboard

GitHub

Python, Pandas, Plotly Dash, Data Visualization, Business Intelligence

- Developed an interactive stock market analytics dashboard using Python and Plotly Dash, enabling dynamic filtering, trend analysis, and multi-stock comparison.
- Designed data visualizations and analytical workflows to support business intelligence, real-time exploration, and actionable financial insights.

Deloitte Australia Data Analytics Job Simulation (Forage)

Tableau, Excel, Data Analytics, Business Intelligence, Data Visualization

- Completed practical data analytics and forensic technology tasks involving business data interpretation, trend analysis, and insight generation.
- Built interactive Tableau dashboards and utilized Excel for data classification, reporting, and business-focused decision support.

Smart Appointment & Queue Management System

Node.js, Express.js, MongoDB, Socket.IO, JWT, Chart.js

- Developed a real-time appointment and queue management platform using Node.js, MongoDB, Express, and Socket.IO, featuring secure authentication, live queue tracking, ETA prediction, and automated notifications.
- Engineered operational analytics features and workflow automation capabilities currently utilized by departments at IGIT Sarang for student registration processes.

AI Pothole Detector

GitHub

Python, YOLO, OpenCV, Raspberry Pi, Computer Vision, Edge AI

- Developed and deployed a YOLO-OpenCV pothole detection system achieving 93% detection accuracy on Raspberry Pi edge devices for low-latency real-time inference.
- Optimized computer vision pipelines for embedded deployment, demonstrating practical experience in AI model deployment and edge computing.

Technical Skills

Programming Languages: Python, SQL, C, C++, Java
Data Analytics: Excel, Tableau, Pandas, NumPy, Statistics, Data Visualization
Machine Learning & Data Science: Scikit-learn, XGBoost, TensorFlow, PyTorch
Generative AI: LangChain, RAG, Agentic AI, Ollama, Prompt Engineering
Databases: MongoDB, SQL
Cloud Platforms: AWS, Google Cloud Platform (GCP), Microsoft Azure
Tools & Technologies: Git, GitHub, Jupyter Notebook, VS Code, Plotly Dash, OpenCV

Certifications

- Google Cloud Skills Boost – Machine Learning Operations (MLOps) for Generative AI (2026)
- Anaconda Python for Data Science Professional Certificate (2025)
- AI Engineer Explorer Certificate Course – Udemy (2025)

Leadership & Communication

- Led teams of 4–5 members across academic and research projects, including DRDO and SAQMS initiatives.
- Presented technical findings and demonstrations to DRDO scientists, faculty panels, and student audiences.
- Hosted technical seminars, workshops, and institutional events at IGIT Sarang.
